

Instructions for setting up the environment in kaggle

1. Download the `src` folder from Moodle.
2. Log into your Kaggle account by visiting <https://www.kaggle.com/>.
3. Go to Kaggle and create a new notebook by clicking on **Create** button on the left side.
4. In the notebook interface, on the right side, locate the **Upload** button under the **Input** section.
5. Upload the individual files (`environment`, `setup`, `install` and `part1`) from the `src` folder to Kaggle.
6. Name the `dataset title` as `setupfiles`.
7. The following images illustrate the steps from 4 to 6:

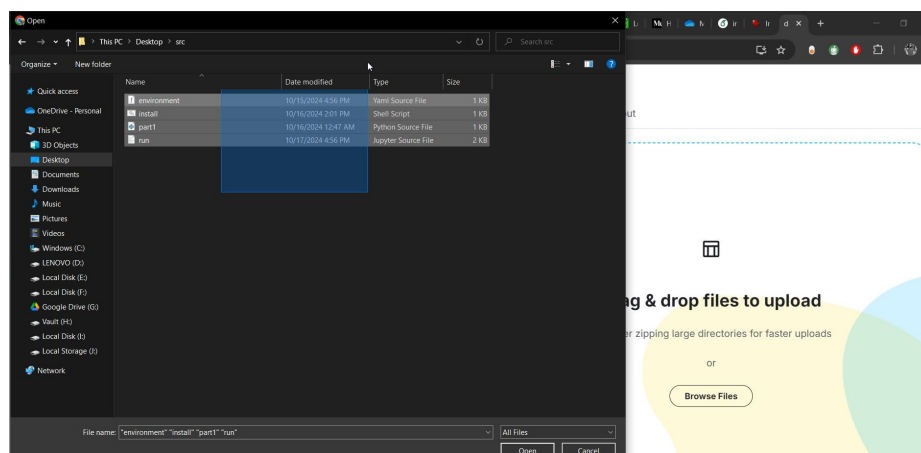

a) Locate the **upload** button.

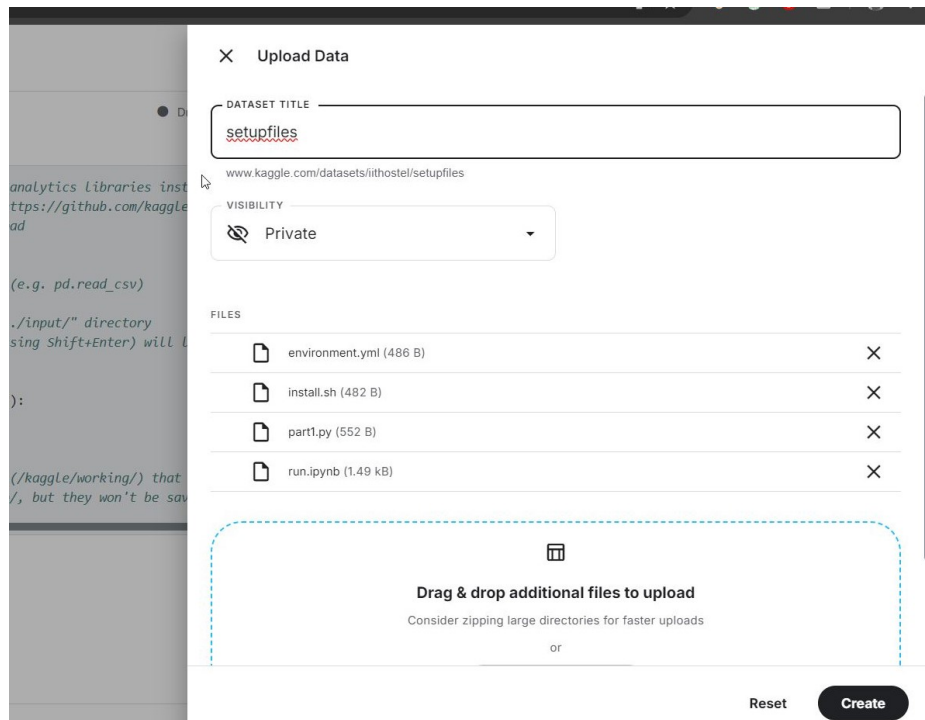

b) Select **New Dataset**.

c) Uploading files from the `src` folder.

d) Naming the folder as `setupfiles`.

8. Open the `run.ipynb` file and run the appropriate commands. This will set up the environment.
9. You can download the bird-dataset from here:
<https://kaggle.com/datasets/7fdf55d7621c63dd82791d1284897afccd5608b803628dfe663587e53ec0a79c>
or here:
https://drive.google.com/drive/folders/1Gq_WULXnCI9xsDLt3DzwJ-NTfwHr2Vgh?usp=sharing.
10. After downloading the dataset on your system. You need to upload it on kaggle as described in point 4. You can name this bird dataset whatever you like.
